

Mirazon Streamlines Connectivity and Technology Management for a Nonprofit

Mirazon provided IT services and consulting for a tutoring nonprofit, helping streamline technology systems across the organization. From deploying new computers to improving internet connectivity and managing Google Workspace, Mirazon enabled more reliable operations, smoother transitions, and increased efficiency for staff.

Engagement	Oct - Nov 2025
Services	Device Deployment, Domain Migration, Network Connectivity

The Situation

I Would Rather Be Reading (IWRBR) is a nonprofit delivering literacy tutoring and after-school programming designed to support children's growth and development.

As IWRBR expanded its programs and staff, the nonprofit needed to streamline its technology systems and ensure reliable connectivity across its operations. This included improving Google Workspace management, transitioning domains, deploying new computers, and strengthening internet performance to better support day-to-day activities.

With these needs in mind, IWRBR partnered with Mirazon to:

- Streamline Google Workspace and improve overall system management
- Deploy new, fully configured computers for staff use
- Improve internet connectivity and reliability across the organization
- Execute a smooth domain transition from .education to .org
- Ensure systems were reliable and ready to support program operations

"What impressed us most about working with Mirazon was their seamless project delivery, exceptional project management, and truly outstanding customer service. Their team was proactive, responsive, and incredibly easy to work with—making every step of the process smooth, clear, and efficient."

Ashley Dearing | I Would Rather Be Reading

The Solution

Domain update & migration: Mirazon executed a smooth transition from a .education domain to a .org domain, ensuring continuity without disruption.

Google Workspace transition: Mirazon connected IWRBR's Squarespace account and transitioned its G Suite subscription to Google as the direct vendor, improving overall management and efficiency.

Device setup & deployment: Mirazon configured and deployed 15 new computers, providing IWRBR's staff with fully operational, ready-to-use devices.

Connectivity improvements: By coordinating with a trusted wiring partner, Mirazon enhanced internet connectivity across the organization's office space.

Project management & coordination: With proactive communication and hands-on coordination, Mirazon ensured the engagement was delivered smoothly, on time, and with minimal disruption.

The Results

Faster, More Reliable Connectivity

Mirazon's connectivity improvements gave IWRBR faster, more reliable internet across the organization, reducing interruptions and allowing staff to stay connected during tutoring preparation, program coordination, and daily operations. As a result, teams can focus more consistently on supporting students and delivering programs.

Streamlined Systems & Improved Efficiency

Thanks to fully deployed computers, an updated domain, and more efficient Google Workspace management, IWRBR's staff now experience smoother day-to-day workflows. These improvements have reduced technical issues, minimized downtime, and improved overall operational efficiency.

Increased Productivity & Organizational Impact

These technology improvements have given staff faster load times, fewer glitches, and better coordination across program sites, leading to increased productivity. As a result, IWRBR is better equipped to support its literacy and after-school programs.
